At present we have only 17 new arrival refugees (which include sick and old people) at the centre. Since 10 March 2008 we are not receiving the new refugees from Tibet because of following reasons:

- 1) The Chinese Government has deployed lots of arm force on the Nepal and Tibet border and also into Nepal to stop all the borders and to have special observation on the new refugees.
- 2) Even in Tibet itself no Tibetan is allow to move from one village to another.
- 3) In Tibet the Chinese official frequently visit to the Tibetan people's house to check the family member's record.

Situation inside Tibet becomes very critical at moment, according to the informing we are getting from Tibet is that the Chinese government has stop supplying food and water to the monasteries and all the monasteries are surrounded by arm force with guns and tanks. Besides that monks are facing heavy tortured by the Chinese police.

Those Tibetan who been arrested for doing peaceful demonstration against the Chinese rule have been taken away to the remote place around Chinese border and put in the mud cave (where brick materials are taking out) in a very congested way and they couldn't even find a space to sit. In the beginning they were provided with very salty rice porridge and make them feel very thirsty. Later they have been stop providing any food and water, and then Chinese authorities told the Tibetan prisoner that now you can die according to your choice. Many are dying without food and water and heard they are drinking their own urine out of thirsty.

One group of Tibetan prisoners are imprisoned in the remote desert area. Its a very sad moment for our Tibet. May god bless them.
